For Bitcoin Businesses

YOU are a Bitcoin business or startup struggling under the weight of the confusing and daunting US regulatory climate. **You want to operate legally within the United States** and are willing to pay taxes on your earnings just like any other legitimate business, but have no clear guidance on achieving compliance and don't even know where to start. You have heard of other major Bitcoin operations experiencing legal issues, being subpoenaed, and having bank accounts forcefully shut down or worse. You want to avoid these problems, you want to be compliant, and you are willing to collect/provide required information just as you would if you were accepting any other form of payment (credit cards, wire transfers, check payments, etc.). Good news, Coin Validation can help.

WE are **your partner in achieving compliance**. We have developed tools and relationships that provide Bitcoin businesses with a full "know your customer" compliance suite. Our goal is to proliferate Bitcoin, and to help Bitcoin companies succeed specifically in the United States of America.

To learn more about how Coin Validation can help your business, get in touch with us today.
